

# Google Cloud Certifications

---

*Google Cloud Platform: GKE*

## *Google Cloud Platform : Cloud Training*

---

- **GKE** : [Kubernetes](#) is an open source solution for managing application containers.
- With Kubernetes, you can decide when your containers should run, increase, or decrease the size of application containers or check the resource consumption of your application deployments.
- HELM - Helm charts are packages that contain all the information that Kubernetes needs to know for managing a specific application within the cluster.

## Google Cloud Platform : Cloud Training

---

- GKE - is a cluster manager and orchestration system for running Docker containers in the cloud.
- GKE a production-ready environment with guaranteed uptime, load balancing and included container networking features. It allows you to create multiple-node clusters while also providing access to all Kubernetes' features.
- Docker & Kubernetes Detailed Course -
- Title - **Kubernetes and Docker MasterClass :HandsOn Kubernetes 2 in 1**

*Will see you in Next Lecture...*

---

*Thank you!*

A close-up photograph of a hand holding a black marker, completing the cursive word 'Thank you!' on a white surface. The hand is positioned on the right side of the frame, with the index and thumb fingers visible, holding the marker. The marker's tip is just finishing the exclamation point. The background is a plain, light-colored surface.
